What is this Course About?

Psychology is the scientific study of behaviour. Together we will explore many of psychology's key areas, tackling issues such as how we develop, manage mental wellness and illness, affect and are affected by others, experience emotions, and make more effective decisions. Throughout the term, we will explore methods modern psychologists use to learn about behaviour, as well as the theories they develop to organize their results. You will continually be asked to practice thinking like a psychologist by learning to recognize psychological themes and principles in your life, and by questioning information about behaviour that we encounter daily in our society. Learning will be evaluated based on a combination of individual and collaborative exams, and short, peer reviewed writing assignments. Join us in studying the most fascinating subject matter ever: us!

Quick Facts: Where? When?

Classes are held Monday, Wednesday, Friday, 1:00 to 1:50 in CIRS 1250. Attendance is expected and is necessary for success. Show respect for your fellow learners and leaders, including arriving on time and leaving after official dismissal. Bring your iClicker device, paper and writing tools. You may choose to bring a computer, but beware of its tendency to side-track attention and decrease comprehension – yours and others’ (Fried, 2008; Sana, Weston, & Cepeda, 2013).

Meet your Leaders in Learning

INSTRUCTOR Dr. Catherine Rawn
Office: Kenny Psychology Building, Room 2523
Welcome to my drop-in office hours:
Mon 2-3, Wed 11-12, Fri 3:30-4:30.
Welcome to my Invitational Office Hour (IOH): Fridays 2-2:45pm, Loop Café across from class. One of the best ways I’ve found for us to get to know each other is through the IOH. Each week I’ll randomly select ~10 students to join me for an informal chat. Come by and say hi!
Email: cdrawn@psych.ubc.ca All general questions should be posted on the Discussion Board in Canvas so everyone can help each other quickly. If you need to email me directly, please put “Pscy 102” in the Subject line and use your UBC alumni email account or your message could get misdirected. I try to respond as quickly as possible, but 48 hours for a reply (excluding evenings and weekends) is about typical.
Web: www.psych.ubc.ca/~cdrawn
Dr. Rawn in ≤ 20 words: Ontario-born; happily married; half-marathon runner; likes travel, historical fiction, chocolate, coffee, wine, Vancouver, a good challenge; dislikes horror movies, cheating.

TEACHING ASSISTANTS TAs are here to help you learn and to help me to evaluate your learning. They will be answering questions on Canvas, grading tests, and holding office hours (if you cannot make that time, email them to see if you can work out an alternative appointment).

STEF BOURRIER
Email: sbourrier@psych.ubc.ca, Office: Kenny 3508;
Office hour: Tuesdays 11-12, Stef in ≤ 20 words: Cognitive science research student who enjoys crosswords, making beer, chats about consciousness. Hardline skeptic, LGBT Ally, vegan, Star Trek nerd.

HOLLY ENGSTROM
Email: h.engstrom@psych.ubc.ca, Office: Kenny 2002, Office hour: Wednesdays 10-11am, Holly in ≤ 20 words: Social psychology grad student who likes reading, coffee (black), hiking, comedy, arguing, talking research, and, of course, dogs.

RACHEL KING
Email: r.king@alumni.ubc.ca, Office: Scarfe 1108A,
Office hour: Wednesdays 2-3, Rachel in ≤ 20 words: School Psychology graduate student, Dublin (Ireland) born, likes documentaries, true crime podcasts, travel, timbits and board games; dislikes cold weather.
Learning Goals: Where are We Going?

I designed this course with specific goals in mind. If you are willing and able to meet the requirements, by the end of this course, you will be able to...

1. define modern psychology and identify some major perspectives within it;
2. recognize, recall, compare, and explain psychological concepts and theories from specific subfields (e.g., developmental and social psychology);
3. apply psychological concepts and theories to gain insight into yourself, others, and events in your everyday life;
4. distinguish basic scientific methods modern psychologists use to understand behaviour;
5. question claims about behaviour that you encounter in your daily life;
6. practice multiple ways of learning to promote retention and understanding (e.g., participate in class, take notes, read text, write, self-test, review others’ work);
7. communicate your ideas about psychology both verbally and in writing;
8. give, receive, and use constructive peer feedback in writing and testing contexts;
9. demonstrate respectful, professional conduct in email, online, and face-to-face communication with your peers, TAs, and Instructor; and
10. feel (even a little bit!) excited about learning in general and about psychology in particular.

What Resources Do You Need?

What other editions will work? Older Canadian editions: not recommended. *US editions* or other books: NO. Used hard copies of the 3rd Canadian edition should be available.

Technology-Enhanced Learning

Throughout this course, we’ll be using various technologies to help us communicate, assess your learning, and keep organized. They are all accessible via a central portal: Canvas.

Canvas canvas.ubc.ca. Keep organized here. Find learning objectives before and PowerPoint slides after class, discussion threads, weekly announcements, forms, your grades, calendar, and links and instructions for all other websites. Log in often using your CWL. Free.

Communicate and engage outside of class using the Discussion threads. The system is catered to getting you help fast and efficiently from classmates, TAs, and myself. Rather than emailing questions to the teaching staff, I encourage you to post your questions here.

iClicker. Communicate and engage during class using an iClicker. Questions and polls will be integrated into every class. Physical iClickers can be purchased at the bookstore, used or new. You must REGISTER YOUR iClicker on our Canvas course website to receive the points you earn in class. (Note, although there is an app version, I do not recommend using it. Former students reported being distracted by having their mobile device out on their desks.)

peerScholar and Turnitin. Submit assignments and conduct peer reviews. Also submit your assignments to Turnitin to help us check for overlap (see instructions p.5). Both Free using Canvas links.

Base Points Available for you to Earn: 100%

Bonus Subject Pool Participation (up to 3 more hours = up to 3%) | 3% | Complete by Friday April 6 |

This course is divided into four sets of two chapters. For each pair of chapters, we'll follow the same process, as depicted in the diagram below. This process is designed to help you distribute your readings and studying throughout the term (Wahlheim, Dunlosky, & Jacoby, 2011), using a combination of writing and peer review that research has shown to help students learn (Dochy, Segers, & Sluijsmans, 1999; Nevid, Pastva, & McClelland, 2012; Nichol, 2014; Siu, 1989). Moreover, the two-stage test format is designed to help you learn from each test and build connections in class (Gilley & Clarkson, 2014; Rieger & Heiner, 2014; Zipp, 2007). Taken together, this course design incorporates at least five methods that have been empirically demonstrated to promote learning (Dunn, Saville, Baker, & Marek, 2013; Dunlosky, Rawson, Marsh, Nathan, & Willingham, 2013).

Strategically Read the assigned chapter (Independent study), before or after you... Attend and engage in classes. Earn participation points while learning by responding to questions during class. (Graded requirement)

Write 1 mini-paper in your own words about one concept from the list for one of the chapters. See the handout on Canvas for instructions and the grading rubric. Post your work on peerScholar and Turnitin. (Graded requirement)

Rate your peers’ (and your own) mini-papers for accuracy and clarity, including constructive written feedback (on peerScholar). (Graded requirement) (Later, revisit the feedback you receive from others and evaluate how helpful it is.)

As you study, quiz yourself on the material to be tested. How well can you answer each Learning Objective from class and the text? Explain every key term? Compare and contrast related terms? Generate examples of each concept? Answer questions on MyPsychLab? (Independent study)

Take a 2-stage exam on the material from those assigned chapters: first individually, then again immediately with teammates. (Graded requirement)
**How Will We Know If We Have Met Our Goals?**

Learning Appraisals: Details

**TWO-STAGE MIDTERM TESTS (3 total, worth 15% each) AND FINAL EXAM (worth 40%)** All tests and exams will consist of a mix of multiple-choice and fill-in-the-blanks questions. The final exam will also include two written sections based on what you write for Writing to Learn mini-papers (see below).

**What is a Two-Stage exam?** In class, take the test on your own, then immediately get into groups of 4-6 and retake it together so you have the chance to discuss and debate answers. Sit near people you want to work with. Individual tests will count for 90% of your test score, and team tests will count for 10%. In the rare case where an individual score is higher than that person’s team score, the individual score will count for the full 100%.

**Why a Two-Stage exam?** Data shows it helps students learn and engage in courses. It provides you with immediate feedback while you still remember the test questions. See my blog post for references and a lengthier rationale: [http://ow.ly/ztdv6](http://ow.ly/ztdv6)

You will be challenged to push beyond memorization of facts and to integrate and apply course material. Research shows greater long term retention when people expect a final test in the future (Szpunar, McDermott, & Roediger, 2007). Therefore, to best prepare you to apply course material in future related courses and to your life in general, the final exam is cumulative.

**WRITING TO LEARN MINI-PAPERS (10%)** These paragraphs will help you to apply course material to understand your everyday life experiences, and will help you practice your written communication skills, including summarizing and connecting concepts, peer feedback, and revision. Below is a summary. See the Handout on Canvas for details

**Peer Assessment Training Workshop** For 1% toward your grade, complete the online peer assessment training workshop available on Canvas. We have designed it to help prepare you to become a better writer and reviewer for the next papers. Details to come.

**Write and Rate Concept Check Mini-Papers** Each assignment requires writing about one concept. Choose one concept from the key terms list from one of the chapters featured on the next test. Summarize, in your own words, what you have learned about this concept, and how this concept relates to something you have experienced in your life (Nevid, et al., 2012). Before each exam, submit your writing to peerScholar and to Turnitin (using the links provided on Canvas). By the deadline after the exam, log in to peerScholar and review four submissions from your peers using the rubric provided, and receive reviews on your work. The average of peer reviews you receive is worth 1%; if you fail to review others’ work, you will receive zero instead of your peers’ grades on your work. Past students report reviewing others’ work is one of the most helpful aspects of this assignment.

On the final exam, you will be asked to choose any TWO concepts from the course and write a page about each them. To study, you can revisit your previous assignments, and consider the peer feedback you received on them, to create your best paragraphs. Note: no notes may be brought to the final exam. More details will be posted in a detailed handout. See all deadlines in Our Course Schedule.

**ENGAGEMENT IN LEARNING ABOUT PSYCHOLOGY (5%)**

Taking responsibility for your learning involves actively participating throughout this course.

**Participation (3%)** Your participation will be evaluated in class by responding to iClicker questions, and outside of class by discussion on Canvas. At the end of the course, all points you earned via iClicker for just answering questions (participation) and getting them correct will be added together. In each class period, earn a maximum of two points by answering at least 75% of the iClicker questions (1 point) and any one of those correctly (1 point). To earn 3% toward your course grade, earn full marks for at least 90% of the classes during the term. Outside of class, meaningful engagement on Canvas may also be considered (e.g., if your final mark falls just below the next grade).

**Required Human Subject Pool credits (2%, plus up to an additional 3% bonus)** Another way to engage in learning about psychology is to be a participant in ongoing research projects. Earn points toward your course grade by participating in research through the Human Subject Pool (HSP), or complete an alternative assignment. Study sign-ups and details about the alternative assignment are posted on [http://psych.ubc.ca/internal/human-subject-pool/](http://psych.ubc.ca/internal/human-subject-pool/).

Participating in a 1 hour study (or completing 1 alternative assignment) earns you 1%; 2 are needed to earn the 2% required. An additional 3 are needed to earn 3% bonus. These points will be added to your final course grade, after any scaling that may be applied.

Engaging in these activities (and others, such as, MyPsychLab study guide activities, class activities, demonstrations, discussions, etc.) will help you learn the material and about the discipline – which should help you perform on tests and papers as well.

| Dr. Catherine Rawn | PSYC 102 Sec 006 Term 2 Winter 2017/2018 |
Expectations and Course Policies

What We Expect from You

ATTEND CLASS  Please come to every class prepared to participate in your learning. Bring your iClicker device, a pen and some paper (in addition to a laptop, if you choose to bring one), and an open mind. **If you must miss class** you are responsible for obtaining missed notes and important announcements. You will not be able to regain participation points for missed classes.

PARTICIPATE  Success in this class depends upon your active participation. **I will ask you to do only those activities that I believe will help you learn.** Class time is designed to mix lecture-based explanations of course material with demonstrations, pair and small group discussions, large group discussions, writing, questions, and feedback. Come ready.

TREAT OTHERS RESPECTFULLY  You are expected to treat all your classmates, the teaching team, and yourself with respect at all times, both in and out of the classroom, face-to-face and in writing (e.g., on email). This includes arriving to class on time and minimizing distractions for other students.

ACT ETHICALLY  You are responsible for your own learning. Cheating of any kind will **not** be tolerated, including dishonest use of the iClicker, and copying other’s work. See the syllabus section on Ethical Conduct for more information.

COMPLETE PAPERS ON TIME  Because of the way the peer review system works, you are required to meet each deadline. **If you are trying to submit late, and the system allows you to submit, then you may.** If the system blocks you out, you have missed your chance. **TURNITIN.COM REQUIREMENT:** After completing your work on Canvas, you must turn in the exact same paragraphs to Turnitin.com within one day of the deadline. Go to [turnitin.com](http://turnitin.com), create an account using your real name (or let me know), and enter our course ID and password (available on Canvas), and submit your work.

WRITE ALL MIDTERM TESTS.  Presence at tests is expected. In most cases, if you miss a test you will receive a zero. There will be no make-up tests. **Exceptions:** In documented cases of varsity athletic commitments (as per UBC policy), severe illness or other extenuating circumstance verified by UBC Academic Advising as warranting Concession, or a conflict with a major religious holiday, obtain appropriate documentation and completed the Request For Excused Absence Form on Canvas. If approved, the worth of the missed exam will be added to the final exam. **Note:** Testimony by unofficial parties such as parents and roommates will not count as appropriate documentation. You must seek official documentation and, ideally, have it verified by an Academic Advisor in your Faculty.

WRITE THE FINAL EXAM  Presence at the final exam is **mandatory.** If you absolutely must miss the final exam due to an extenuating circumstance like severe illness, you must apply for Academic Concession by contacting your Faculty’s Advising Office (e.g., Arts Advising through the Centre for Arts Student Services). If you have 3 or more exams scheduled to start and finish within a 24 hour period you may request to write the second exam on a different day. However, you must give the instructor of the second exam one month notice.

SHARE CONSTRUCTIVE FEEDBACK  We invite you to share your ideas and suggestions with us, particularly about things we are able to change, and be open to working together to make this course a positive experience for all of us.

USE ELECTRONICS IN THE CLASSROOM RESPONSIBLY  You may choose to use electronic devices to support your learning—not distract from it. Part of the room will be designated a “laptop-free zone” for people who wish to remain distraction-free during class.

What You Can Expect from Us

BE AVAILABLE  We are here to help you in your choice to succeed. Visiting us in person is typically more effective than email for clearing up questions. If office hours absolutely cannot work for you, respectfully email us a few time and day options to make an appointment. Because of our class size, there may be limits on the number of appointments possible.

POST SOME MATERIALS ONLINE  PowerPoint slides and handouts will be available after class on our course Canvas site. Learning Objectives will be available there before class.

TAKE PHOTOGRAPHS  To help document active learning, I may take some photographs throughout the term. Please see me within the first two weeks of the course if you have serious concerns about this.

ARRANGE FOR AND PROVIDE FEEDBACK  Your peers will be an important source of feedback throughout this course. In addition, we will attempt to provide you with feedback on learning appraisals as promptly and as with as much detail as possible, given the size of our class. See us for more details.

ACT RESPECTFULLY & ETHICALLY  At all times, we aim to treat each of you with respect, and to make all course decisions with the highest standard of ethics in mind. If you feel you are being treated unfairly or disrespected by us or a classmate, we invite you to talk to us so we can sort out the issue together. To be clear: such a discussion would not impact your grade.

CONSIDER RE-GRADE REQUESTS  If you feel very strongly that any exam question was graded unfairly, please submit the Re-Grade Request Form available on Canvas. You must submit the form within 2 weeks of the date grades were made available on Canvas. I will consider your request carefully and will respond via email in approximately one week of receiving it. Re-grading may result in an increase or decrease. That re-grade is final.
Tips for Success: Making Choices to Learn!

I believe you can master this course material at a high level, if you consistently choose to put in the effort required to do so. Here’s a rough guideline for how much time you should be spending on this (and each of your) courses this year: **2-3 hours out of class for every 1 hour in class.** Note that some people will need more time than this.

**WHAT CAN YOU DO IN CLASS?**

- **Take notes** about what’s being discussed, using the Learning Objectives to help determine what is most important. Avoid just copying exactly what you see on the slides; you’ll get those words later.
- **Keep focused.** For example, avoid bringing a computer (or sitting behind someone else’s) if it will be a distraction for you. Get adequate sleep and nutrition.
- **Actively participate in activities, demonstrations, and discussions; thoughtfully answer iClicker questions.** The point of all of these is to help you think about the material so you can master it and make it meaningful for your life.
- **Ask questions.** Be brave! If you would like clarification or are interested in how a concept connects or applies in some way... ask it!

**WHAT CAN YOU DO DURING THOSE 6-9 HOURS PER WEEK YOU SPEND ON THIS COURSE OUTSIDE CLASS?**

- **Add to your class notes.** Fill in any missing gaps before you forget. Integrate your notes with the slides posted online. *Build your notes so you can use them to study later.*
- **Actively read the text.** For example, take notes using the section headers; convert headers into questions to help you identify the most important points. Take every chance available to test yourself (Bjork & Bjork, 2011). For example, complete “Assess your knowledge,” “Apply your thinking,” and “Think again” sections; after each chapter, close your book and freely recall everything you can remember, then go back and check what you got correct and what you missed (Karpicke & Blunt, 2011). *Build your notes so you can use them to study later.*
- **Test yourself using learning objectives from class and the text.** What should you be able to do with the course material? Learning objectives are designed to help you answer this question so you can study more effectively.
- **Explore the MyPsychLab activities** that come with your text.
- **Write your Writing to Learn Mini-Papers.** Start early! Seek advice from the Writing Centre, me, our TAs, and your peers.
- **Come to office hours and post questions on Canvas.** Get to know your Leaders in Learning, ask questions about course material, and find out more about psychology!

---

Learning Tools to Investigate

I encourage you to take responsibility for your learning and check out what these resources have to offer.

**COLLEGE SUCCESS STRATEGIES** By S. L. Nist-Olejnik & J. P. Holschuh (2012, 4th edition). This book offers countless tips and strategies. It is primarily geared toward new university students, but there is a ton of useful information in there for upper years as well, from any discipline.

**TIME MANAGEMENT** Search online for productivity and project management tools and apps (e.g., https://trello.com, https://www.rescuetime.com/, https://todoist.com). Give yourself enough time for papers with http://assignmentcalculator.library.ubc.ca, and master many other aspects of academic life http://learningcommons.ubc.ca/student-toolkits/

**UBC ACADEMIC REGULATIONS** Information about academic regulations, course withdrawal dates and credits can be found in the University Calendar.

**LEARNING COMMONS** is UBC’s online hub for study and research support. This interactive website provides you with a wealth of academic resources, from tutoring and workshops to study groups and online technology tools. It also offers plenty of information on a variety of academic topics, and links to nearly all of the academic resources offered at UBC. Make the Learning Commons your first stop for all things academic! http://learningcommons.ubc.ca

**WRITING SKILLS** The UBC Centre for Writing and Scholarly Communication offers tutoring services, workshops, and advice. Also, Purdue University offers an amazing collection of information about writing at their Online Writing Lab (OWL), available at http://owl.english.purdue.edu/owl.

**PHYSICAL OR LEARNING DISABILITIES** UBC is committed to equal opportunity in education for all students and so are we! If you have a documented disability that affects your learning in the classroom or your performance on tests or exams, please contact Access & Diversity in Brock Hall 1203, 1874 East Mall, Contact: 604.822.5844, www.students.ubc.ca/access. If your disability requires extra exam time, meet with Dr. Rawn as soon as possible to discuss accommodation options for the two-stage exams.

Let’s work together to make this course a positive experience for all of us.
Psychology Department Grading Policies

To meet department policy, the typical student demonstrating adequate performance on learning appraisals will earn around 63-67% in this course.
Read on for details.

In order to reduce grade inflation and maintain equity across multiple course sections, all psychology courses are required to comply with departmental norms regarding grade distributions. According to departmental norms, the average grade in a 100- and 200-level Psychology courses are 67 for an exceptionally strong class, 65 for an average class, and 63 for a weak class, with a standard deviation of 14. The corresponding figures for 300- and 400-level classes are 70, 68, and 66, with a standard deviation of 13. Scaling may be used in order to comply with these norms; grades may be scaled up or down as necessary by the professor or department. Grades are not official until they appear on a student’s academic record. You will receive both a percent and a letter grade for this course. At UBC, they convert according to the key below:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>

Faculty of Arts Guidelines for Grading Criteria

You are earning a degree at a highly reputable post-secondary institution. Therefore, criteria for success are high. The Faculty of Arts offers the following guidelines (also available on this website) that broadly characterize the kind of work that is generally associated with the main grade ranges. These characteristics help to put the Psychology Department Grading Policies into context. Note that adequate performance is in the C range, which is the typical class average.

A RANGE: Exceptional Performance. Strong evidence of original thinking; good organization in written work; capacity to analyze (i.e., break ideas down) and to synthesize (i.e., bring different ideas together in a coherent way); superior grasp of subject matter with sound critical evaluations; evidence of extensive knowledge base.

B RANGE: Competent Performance. Evidence of grasp of subject matter; some evidence of critical capacity and analytic ability; reasonable understanding of relevant issues; evidence of familiarity with the literature.

D-C RANGE: Adequate Performance. Understanding of the subject matter; ability to develop solutions to simple problems in the material; acceptable but uninspired work; not seriously faulty but lacking style and vigour.

F RANGE: Inadequate Performance. Little or no evidence of understanding of the subject matter; weakness in critical and analytical skills; limited or irrelevant use of the literature.

Consider these characteristics when making choices about the quality of work you submit in all learning appraisals, in this and any other course.
Ethical Conduct: Practices and Policies

Don’t Cheat. Don’t Plagiarize. It’s Not Worth It.

Read on For Key Definitions, Consequences, and Ways to Act Ethically

The consequences for unethical conduct are more severe than you may think: you may fail the assignment or test, you may fail the course, you may be expelled from University, and unable to attend any other post-secondary institution in the future. Think about the long-term implications of that outcome in your life.

Psychology Department’s Position on Academic Misconduct

Cheating, plagiarism, and other forms of academic misconduct are very serious concerns for the University, and the Department of Psychology has taken steps to alleviate them. In the first place, the Department has implemented software that can reliably detect cheating on multiple-choice exams by analyzing the patterns of students’ responses. In addition, the university subscribes to Turnitin — a service designed to detect and deter plagiarism. All materials (term papers, lab reports, etc.) that students submit for grading will be compared to over 5 billion pages of content located on the Internet or in Turnitin’s own proprietary databases. The results of these comparisons are compiled into customized “Originality Reports” containing several, sensitive measures of originality that flag instances of matching text suggesting possible plagiarism; instructors receive copies of these reports for every student in their classes.

During exams, the instructor and invigilators reserve the right to move students in their seating arrangement with no explanation provided.

In all cases of suspected academic misconduct, the parties involved will be pursued to the fullest extent dictated by the guidelines of the University. Strong evidence of cheating or plagiarism may result in a zero credit for the work in question. According to the University Act (section 61), the President of UBC has the right to impose harsher penalties including (but not limited to) a failing grade for the course, suspension from the University, cancellation of scholarships, or a notation added to a student’s transcript. For details on pertinent University policies and procedures, please see Chapter 5 in the UBC Calendar (http://students.ubc.ca/calendar).

Why is Academic Misconduct Treated So Harshly?

Some people don’t feel like cheating on a test or taking a sentence or two from someone else’s paper without citing it is a big deal. Here’s a bit of insight into why we care so much.

In the academic community—a community of which you are now a part—we deal in ideas. That’s our currency, our way of advancing knowledge. By representing others’ ideas in an honest way, we are (1) respecting the rules of this academic community, and (2) showcasing how our own novel ideas are distinct from but relate to their ideas. Formatting styles like APA and MLA give us formal ways to indicate where our ideas end and where others’ begin. Welcome to the academic community. You are expected to act honestly and ethically, just like the rest of us.

Participating Ethically in the Academic Community

What can you do to ensure you are acting ethically? First, recognize that all graded work in this course, unless otherwise specified, is to be original work done independently by each individual.

Visit the Learning Commons’ guide to academic integrity UBC offers an online guide to preventing unintentional plagiarism and organizing your writing. Visit http://learningcommons.ubc.ca/resource-guides/avoiding-plagiarism/

Be careful and critical of what you read and choose to cite. Unless otherwise specified, in psychology courses reference all material using APA style; if you cannot find a proper reference, question whether that source is appropriate to use. Do not copy and paste text from other sources, even in a draft, as you might unintentionally misrepresent those words as your own in a later draft (which would still qualify as plagiarism).

If you have any questions about what sources to use or how to cite them without plagiarizing, please see your Instructor or TA before handing in your assignment.
### Our Course Schedule

This plan is subject to change. Changes will be announced in class and posted on the Canvas course website.

</table>

The final exam date will be set by the registrar. **Do not book travel during exam period, April 10 to 25, 2018, including Saturdays.** The Final Exam will feature most heavily the new material covered since Test 3 (Chapters 15-16 and RMM, plus class material), but will include class and reading material from the entire course (Chapters 1, 2 (pp. 44-46, 51-71 only), 9-16, and class material).

---

**ACKNOWLEDGEMENTS AND COPYRIGHT**  Thanks to all of my introductory psychology students and Teaching Assistants since 2009 for their helpful suggestions and experiences, which have influenced the design of this course. In addition, this course and syllabus design were informed by those from similar courses designed by W. Buskist (Auburn University), M. Casteel* (Penn State), R. Day (Simon Fraser), P. Graf (UBC), R. E. Lee (Blackhawk College), J. Lymburner (Kwantlen Polytechnic University), P. Marek* (Kennesaw State), and C. Pederson (Kwantlen Polytechnic University). *Peer-reviewed syllabus available from the Society for the Teaching of Psychology’s Office of Teaching Resources in Psychology website (http://teachpsych.org/otrpp/syllabi/index.php#.Uho-X5Kkr08).
